→ "B-"

- Get **read and display** manifest working.
- Get **balance** working, without a heuristic, without considering a buffer, not the SIFT case.
 - Slow for more than 10 containers, cannot solve problems when ship is above 50% capacity, cant do SIFT cases
- Now get **transfer working** (no error checking, assuming perfect input)

→ "A-"

- Now get **recover from power failure** working.
- Now get **error checking** working.
- Now add **heuristics** to the search, to speed it up.
- Now add **buffer** to the search, to allow you to handle when ship is above 50% capacity

What day to meet?

Thursday	3 votes 21%
Friday	4 votes 29% ✓
Saturday	4 votes 29% ✓
Sunday	3 votes 21% ✓

Let's do a poll

 **Byron Bhuiyan** 12/7/24, 02:58
here's an exhaustive list of everything we need to do in chronological order (for the most part)

🔥 1 🗨️

Changes to make:

- Balance Pages
- Transfer Algorithm w/ Manhattan
- Balance Algorithm w/ Manhattan
- Name and weight input for incoming containers
- Manifest Updating
- Logging
- SIFT algorithm (for Balance)
- Power Outage Protection
- VFX
- Operations Box
- Comments
- Styling Changes
- Deployment
- Report
- Testing
- Demo
- Final email

 **Byron Bhuiyan** 12/7/24, 03:16
until further notice continue working on algorithms or whatever you were assigned on github

👍 2 🗨️
